

Polispot[®] Polispot Plus[®] & Policoat[®]

High Performance Spot and Flood Coating Solutions

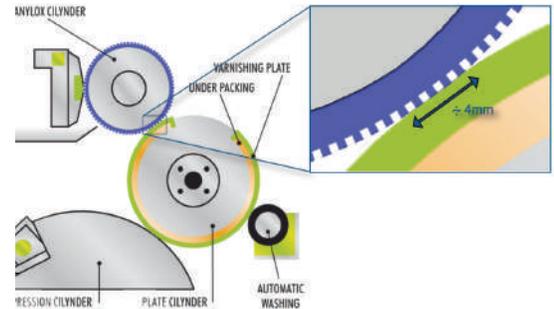

A complete range of products for coating and varnishing.

POLISPOT	Universal polymer blanket for water-based/acrylic and UV coatings
POLISPOT AQUA	Economy polymer blanket for water-based/acrylic coatings
POLISPOT UV	Premium polymer blanket designed for use with UV coatings
POLISPOT COMPRESSIBLE	Compressible polymer blanket for water-based/acrylic and UV varnishes
POLISPOT PLUS	An innovative multi-layer varnishing plate for all kinds of paper and varnishes
POLICOAT	Self-adhesive film for off-line/indirect coating

Polispot Polymer coating blankets for spot and flood coating are manufactured using an exclusive multi-layer technology on a polyester base ;

- ✓ Minimum ink build-up allowing long runs without back trapping inks.
- ✓ Produces the smoothest coating without any “orange peel” effect
- ✓ Reusable with no registration problems
- ✓ Highest dimensional stability for longer blanket life.
- ✓ Easy to cut (by hand or with a CAD) and strip
- ✓ Easy to clean

Direct Coating:

POLISPOT
Translucent polymer blanket for UV and acrylic/water based coatings

POLISPOT AQUA
Translucent economy polymer blanket, for acrylic/water based coatings.

POLISPOT UV
Translucent, polymer coating blanket with high resilience to UV coatings for longer UV runs

POLISPOT COMPRESSIBLE
Translucent, compressible polymer coating blanket for UV and acrylic/water based coatings, particularly needed when using recycled or uneven paper.

POLISPOT PLUS
Maximum flexibility and Improved durability because its special compressible top layer which delivers ideal softness and resilience, as well as improved resistance to mechanical stress and chemical aggression.

Indirect Coating

POLICOAT
Translucent, self-adhesive polymer varnishing plate for water based and UV coatings, designed to be applied to the aluminium plate for indirect spot and flood coating jobs.
